MANAGEMENT DISCUSSION AND ANALYSIS

1. INDUSTRY STRUCTURE AND DEVELOPMENTS:

COAL INDUSTRY

In India's energy sector, coal accounts for the majority of primary commercial energy supply. India is endowed with large quantum of coal reserves (315 BT) have been estimated by the Geological Survey of India, of which around 90% comprises non-coking coal. India is the world's fourth largest producer of coal, after China, the United States and Australia. There has been a continuous increase in overall consumption of coal over the years. Consumption / actual supply of coal (including Import) increased from 739.34 MT in 2013-14 to 897.34 MT in 2017-18. As per data provided by CCO, Demand for coal for 2018-19 was estimated at 991.35 MT against which, actual supply of coal in 2018-19 (provisional) was 968.10 Mte. India accounted for around 11% of the global coal consumption. India remains the second largest coal consumption in the world.

The all India Production and dispatch of coal were 730.354 MT and 471.70 MT respectively. Production and dispatch/offtake Growth was 7.9% and 7.7% respectively over the corresponding period of the previous year 2017-18. Despite being the third largest coal producing country in the world, India is dependent on imports to meet around 20–25% of its coal demand. India imported a total of 190.95 MT of coal in the year 2016-17, 208.27 MT of coal in the year 2017-18 and 176.65 MT in the year 2018-19. In order to meet this massive demand and minimize the imports of coal (especially non-coking coal), the government has put coal production in the country on fast track and has set a target of 1.5 BT of domestic coal production by FY 2020.

In 2018-19, the industry will naturally need to focus on building on the success of 2017-18, and be on track for reaching the FY 2020 goal. With the economy poised to grow at the rate of 8–10% per annum, coal will continue to be a dominant commercial fuel two decades from now and beyond, despite our nuclear energy programme, development of natural gas supplies, increased hydropower generation, and emphasis on renewables.

In order to satisfy the coal demand, the Indian coal industry needs more investment and private players to raise their production level. The Government has taken initiatives by making Statutory Acts, with an objective of ensuring continuity in mining activities and production of coal and to promote optimum utilization of coal resources consistent with the requirement of the Industry. Steps as to develop better infrastructure of roadways and railways, augment infrastructure for logistics, smooth land acquisition, easy availability of water, develop coal washeries, capacity building and skill development, etc., are getting better by various projects and actions undertaken by the Government.

REAL ESTATE INDUSTRY

The world sees India as a land of opportunity for business and Investment. The Indian Real Estate Sector has been a major beneficiary of the strong economic growth witnessed in India since the year 2000. In the country, it is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. According to a study by ICRA, the construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

The growth in sector, supported by series of reforms has not only resulted in significant residential and commercial real estate, but also complimented the development of physical and social infrastructure of the Country. The Indian real estate market is expected to touch US\$ 180 billion by 2020. Housing sector is expected to contribute around 11 per cent to India's GDP by 2020. In the period FY2008-2020, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs. The growing flow of FDI into Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards.

2. OPPORTUNITIES & THREATS:

The Company's business comprises of two segment viz. Coal Trading and Infrastructure.

Demand of Coal mainly from Power Sector is growing rapidly and increasing government support will boost the coal production in the country. However bottlenecks like domestic coal transportation, lack of proper road connectivity, availability of railway wagons and mismatch of demand and supply of wagons and coal offtakes affect production capacity and delay in mining activities at captive coal blocks and concern relating to the increasing ash content of run-of-mine coal further impact production. Real estate is a capital and labour intensive industry, thus a rise in the cost of labour creates issues in the development of the project. Furthermore, unfair practice of certain sections of distributors and cement industry by raising the price creates issues in the project completion.

In India, Coal is irreplaceable as prime energy and it would continue to be so in the foreseeable future. Admittedly, a conscious impetus is laid on alternative clean and renewable energy sources, especially solar. India target to add renewable

energy. This move is in accordance with Paris protocol and certainly a welcome step as it would supplement coal's entirely substitute it.

There have been many reforms set by the government, including RERA and GST which have its effect on the industry. For both, home buyers and real estate developers, these reforms have changed the face of the industry. With complete transparency, home buyers and developers can have an easy business.

Real estate and Infrastructure sectors are getting major funding from foreign investor as per relaxation in Foreign Direct Investment (FDI) rules/ regulation implemented by India. With more and more FDI, government schemes and transparency, the real estate sector in India is set to change dramatically. Though there are challenges and opportunities for developers and home buyers, according to which they need to plan out for easy flow and have a positive long-term effect.

The Government has also facilitated the growth of the real estate sector by introducing massive changes in the taxation and regulatory aspects of real estate. The setting up of the RERA is one step towards streamlining real estate business and ensuring that the buyer gets full value for the money he/she is spending in acquiring a home. The RERA norms might be stringent but it has ensured lot of transparency in real estate dealings.

3. OUTLOOK

According to the Global Economic Prospect Report, June 2018, of The World Bank, the Indian economy is expected to grow by about 6.8% this year and by about 7.5 % in the next two years. As per the Bank, the Indian economy is robust and has the necessary potential to deliver the expected growth rate. Further as per the Bank, due to the good performance of India's economy, growth in South Asia is expected to be 6.9% in 2018 and 7.1% in 2019. In the current fiscal 2018-19, the outlook for growth is a forecast range for real GDP growth of 6.8% to 7.5%. India is undergoing structural shift in the inflationary process towards low inflation. The energy market is very different today than a few years ago in a way as renewables play an increasing influence.

COAL INDUSTRY

India is the world's third largest coal consumer behind China and the United States; and the share of coal in India's electricity mix has been rising. India's coal consumption was estimated at 790 million tonnes (or 516 million tonnes of coal equivalent (Mtce), around 10 per cent less than the United States (IEA 2014). Thermal coal accounts for around 85 per cent, or 665 million tonnes, of India's coal consumption. Metallurgical coal (80 million tonnes) and lignite (45 million tonnes) make up the balance.

The power sector accounts for more than 70 per cent of India's coal use and supported a five-fold increase in coal use in electricity generation over the past few decades. As such, the power sector is clearly central to the coal outlook in India. India's steel production has increased by around 25 per cent over the past five years to around 83 million tonnes in 2014. The cement industry, the second largest globally after China, is also a major coal user, accounting for around 5 per cent of total coal use. Other industrial sectors, including brick manufacture, consume small quantities of coal.

In the long term, India needs to take at coal to gas i.e. cleaner energy sources. Clean coal as an idea has huge potential in India because of the age and inefficiency of some of our plants. With government's efforts to push renewable energy due to international conventions on climate change, increase in carbon cess and other initiatives for lesser use of coal, there is a need for 'Vision 2030 for the coal sector', which takes into account the environmental factors such as reduction of carbon footprint, abatement of global warming. India's ambitious renewable energy goals have received a lot of international attention, but coal still provides half of India's commercial primary energy and is the dominant fuel for power generation. We expect coal to remain the dominant fuel in the power sector in India, through 2030 and beyond.

REAL ESTATE INDUSTRY

The Indian real estate market size is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's gross domestic product (GDP). Also, in the period FY 2008-2020, the market size of this sector is expected to increase at a compound annual growth rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs. If the economy grows at the rate of 10% the housing sector has the capacity to grow at 14% and generate 3.2 million new jobs over a decade. Private equity players are considering big investments, banks are giving loans to builders, and financial institutions are floating real estate funds. Indian property market is immensely promising and most sought after for a wide variety of reasons.

The Indian Real Estate Sector is currently witnessing a structural transformation towards being a complete organized sector. The transformation is due to multiple initiatives by the Government such as the Real Estate (Regulation and Development) Act, 2016 ['RERA'],

increased incentives for affordable housing like Pradhan Mantri Awas Yojana (PMAY), Credit-Linked Subsidy Scheme (CLSS), Real Estate Investment Trust Regulations, 2014 (REIT Regulations).

The Sector has been witnessing enhanced interest from Institutional capital owing to greater transparency, reforms such as RERA and REIT Regulations. The commercial sector continues to demonstrate immense potential while the residential sector is undergoing a short-term unpredictable disruption attributed to various reforms.

However, it is expected that these reforms are projected to augur well for industry in the long run. Interest rates are softening and the banks have started to pass this benefit to the customers. The sector will witness enhanced demand flowing in after the complete benefit is transferred to the customers.

Though, there are positive and negative things taking place during, real estate sector will face some challenges and opportunities throughout the year. The stakeholders are positive regards the residential new launches and sales in the coming six months largely on the back of stable prices and transparency induced by policy reforms such as RERA and GST.

ANNEXURE “B” TO THE AUDITORS’ REPORT**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)**

We have audited the internal financial controls over financial reporting of **Hemang Resources Limited** (“the Company”) as of 31 March 2019 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

On attachment of coal of HRL, HRL approached Bombay High Court for releasing the coal on the ground that, they are not party to the Execution Petition hence the coal owned by them cannot be attached. However the court dismissed their application against which they went in appeal. The Bombay High Court vide order dated 06.09.2016 passed in Appeal No. 794/2015 held that, “on account of various factors such as common directorships, interlocking shareholding HRL is not only part of ANRIL/BIL group, but are alter-egos” hence the attachment of coal was upheld.

That out of 34300 MT 17300 MT coal was auctioned to Global Coal Ventures Pvt. Ltd. in compliance to the order dated 16.11.2016 passed by Tuticorin Court and the balance coal of 17000 MT was also auctioned by the Court Receiver appointed by the Bombay High Court to Global Coal Ventures Pvt. Ltd. for a sum of ₹ 3,14,50,000/- which was deposited with the Court Receiver.

HRL had filed an application under Order 21 Rule 58 of Civil Procedure Code before Tuticorin Court claiming his title over the 34300 MT and also filed an application for transferring the said amount ₹ 3,14,50,000/- to Tuticorin Court. But both the said applications were returned back to HRL holding that the applications are not maintainable. Against this order the management is in the process of filing petition before the Madurai High Court. The Management is hopeful of favorable orders from the higher courts and hence no provision has been made.
